

Hello world!

# JUAN CARLOS CANTÓ MARTINEZ

## SENIOR SOLIDITY DEVELOPER

### WORK EXPERIENCE

#### Innovation Director and Solidity Tech Lead

BlockAlchemists  
Mar 2021 - Present

- Making sure that the solutions provided to clients are not only innovative but also make sense and are usable.
- Making sure the products developed are programmed with the best possible code quality.

#### Senior Solidity Developer

Capgemini  
Jul 2018 - Mar 2021

- Worked with a team of 5 devs, to test and implement possible ideas for web2 clients.
- Made sure that the junior and mid level devs wrote code up to par and implemented testing for them.

#### Senior Solidity Developer

EscuelaCryptoES  
Jun 2017 - Mar 2021

- Developed and implemented smart contracts for clients that wanted to give a try to blockchain technology.
- Refactorized and implemented unit testing for older projects.

### RECENT CLIENTS

#### Tin DeFi - 2022

Blockchain based Social Network

- We developed the smart-contracts and APIs to retrieve information via Alchemy RPC and GraphQL

#### Likida - 2021

NFTs with custom implementations

- We programmed a bunch of native NFT solutions revolving physical objects and experiences with low friction for users, some examples are concert tickets that are NFTs or collectibles with an NFT pegged.

### PROFESSIONAL SKILLS

#### Coding Languages:

Solidity, JavaScript.

#### Frameworks/Systems:

HardHat, Truffle, web3js, EtherJS, VisualStudio Code, Remix, NodeJS, React.

### ABOUT ME

I am a Senior Solidity developer who loves challenges, and spending countless hours programming until that final code compilation, no errors and all tests pass with success.
